PROFILE

Currently just completed Code Institute's Diploma in Software Development (**First Class Honours**).
Prior to this, was CEO at Urdin Spain SL and also served as investment advisor for over two years for Betel Ltd., Bulgarian Firm.
Confident building end to end applications from wireframe to deployment. Designing attractive front-ends and solid logic in the back-end. Hoping to advance career in a software development role. Preferably in a company offering further learning opportunities and exciting career progression.

EXPERIENCE

Urdin Spain S.L CEO(4 years 6 months) Madrid y alrededores, España

Started my own business in 2013. Urdin Spain S.L was all about searching for, valid and involved Freelance developers and designers, that would meet the requirements of several business interested in creating their own web platforms and apps.

As an involved party between both, I got to better understand the client needs and doubts. Working closely with developers of very different backgrounds by managing the projects, gave me a unique insight of the field, eventually ending in a true interest in software development.

Five years as CEO of Urdin Spain SL really opened my eyes to the new way of presenting, creating and handling clients using the internet as a tool to enhance their business opportunities.
